

UNIVERSITY CATALOG

Ferris State University publishes a University Catalog that includes information regarding the University, its colleges, programs, degrees, admissions requirements, courses, course prerequisites, student services, financial aid, and related information. While the catalog is an informational piece for prospective students, its primary purpose is for use as a tool for faculty and staff in advising and mapping out degree programs for enrolled students, and for students selecting programs, courses of study and accessing information about the campus.

The Vice President for Academic Affairs (VPAA) or designee has oversight responsibilities for the production and maintenance of the University Catalog. The VPAA approves the content of the catalog in accordance with Academic Affairs' and Board of Trustees' policies. In order to maintain the integrity of the online catalog program sheets, ALL college websites will link ONLY to the online catalog program sheets.
