

Elements of an Articulated Program

2 + 2 Articulated Program

11th Grade High School Junior	12th Grade High School Senior	13th Grade College Freshman	14th Grade College Sophomore
Increased Rigor of Coursework, College Credit Options Tech Prep		Advanced Placement, No Duplication of Coursework	

Seamless Transition

The student is prepared to enter the workplace or transfer to a university for a 4-year degree* upon completion of the articulated 2 + 2 degree or certificate program.

**Students must complete a transfer degree to seamlessly transfer to a state university.*

An articulated program includes a “coherent sequence of courses” building from very basic skills taught in the early high school years to more advanced skills taught during junior and senior years in high school, and finishing with the highly advanced, targeted training gained at the post-secondary level. To be articulated, the program must include not only the career and technical courses associated with the training, but also the academic courses that support the skills preparation for the workforce.
