

## Faculty Research Committee

Chair: Paul Klatt

### 2010-11 Final Report

The committee met regularly throughout the year. We received a copy of the "Policy for Allegations of Research Misconduct" for review. Following several discussions, we concluded that a policy recommendation is better suited from those more qualified to address legal issues and related matters, such as FSU legal council, the Research Integrity Officer or others. We also discussed the Senate Committee Task Force's review of our committee.

We reviewed and recommended our single submitted proposal for funding.

The committee was forwarded a proposal from the Professional Development Committee for review. We conducted several lengthy discussions concerning virtually all aspects of the forwarded proposal and eventually sent it back. This event raises more questions about the interactive role between the Faculty Research Committee and the Professional Development Committee. Vice President Michael Berghoef agrees and as a committee we are committed to participate in further dialog to help distinguish between them.

The committee looks forward to reconveining in the fall.
