**American Society of Heating, Refrigeration, and Air Conditioning Engineers
(ASHRAE) Students Network at The AHR Exposition- New York**

14 ASHRAE student members attended the world's largest HVACR event, The AHR EXPO trade show held at the Javits Convention Center on January 22 - 24, 2008, in New York City, NY to network for employment within the HVACR industry. The 2008 AHR Exposition highlighted new products in the industry and the latest in green technologies, along with a number of green educational sessions. Matthew Klok, ASHRAE Student Chapter President comments, "Ferris HVACR students were able to network for employment and attend a student breakfast honoring 2007 ASHRAE winners in System Selection and Design competitions. Over all the experience was rewarding; we gained more technical knowledge and were able to meet potential employers face to face."
