

FIVE WAYS MYDEGREE CAN HELP DURING REGISTRATION

1. **Reduce your student debt by achieving your academic goals in a timely manner:** MyDegree applies your earned college credits to specific Ferris/Kendall academic programs, while showing complete, in-progress courses, and courses that are *Still Needed*.
2. **Explore other degree options using the “What If” tool:** The “What If” tool will allow you to see exactly how your earned college credits apply to other Ferris/Kendall degrees in the event that you are considering changing your major, declaring a second major, a concentration, minor, or a host of other activities that would change your degree requirements. This feature may be helpful to you when making decisions regarding your career path and what degree will work best to achieve your goals.
3. **See course information at a glance:** Click on a *Still Needed* course to display the course title, course description, sections of that course that are being offered in an upcoming semester, and the equivalent course options that can be taken at another institution.
4. **See course prerequisite information at a glance:** Courses that have a prerequisite will have an asterisk next to the course on your degree audit. Click on the course link to display the course prerequisite (s).
5. **Use the Planner tool to plan for registration:** Use the Planner to make sure you are scheduling the courses your advisor recommended in that specific term.
