HVACR Technology Mission Statement
The mission and goal of the program is to educate students for positions in field service, design, engineering laboratories and service technology at the upper level of the technological spectrum in the HVACR industry.

HVACR Technology Degree Relevance
Ferris is one of the primary sources of degreed HVACR technicians provided to the State of Michigan. This degree has modified its curriculum through the years to stay in tune with the university’s mission, including research with replacement (non CFC, ozone depleting) refrigerants and development and administration of nationally mandated refrigerant recovery certifications. The program also provides technical information and services to the industry on a continual basis, conducting technical seminars that attract participants from across the nation. Every year approx. 30 percent of the graduates go on into the Ferris HVACR Engineering Technology Program.
