

Appendix B

Exposure Determination by Job Classification

All of the following job classifications require Staff and Student Employees to perform procedures or occupation-related tasks that involve exposure, or the potential for exposure, to blood or other potentially infectious material, or that involve a potential for spills or splashes of blood or other potentially infectious material, are included in this exposure determination.

Department/Program	Position	Activity with Potential Exposure
Biology Department	Faculty, Staff, Student Employees	Experiments involving blood or OPIM, human cell lines
Biology Department - AP	Faculty, Staff, Student Employees	Exposure involving unfixed tissues or OPIM, human cell lines
Biology Department - Research	Faculty, Staff, Student Employees	Research involving blood or OPIM, human cell lines
Biology Department - Research involving animals infected with human infections	Faculty, Staff, Student Employees	Research involving human blood or OPIM in animals

The following body fluids are not expected to be infectious sources of bloodborne pathogens unless they are visibly contaminated with blood:

- Urine
- Feces
- Vomit
- Tears
- Sweat
- Sputum
- Nasal Secretions

Faculty, Staff and Student Employees who do not perform the activities listed above where there is potential exposure are classified as Category B.
