

Appendix B

Exposure Determination by Job Classification

All of the following job classifications require Staff and Student Employees to perform procedures or occupation-related tasks that involve exposure, or the potential for exposure, to blood or other potentially infectious material, or that involve a potential for spills or splashes of blood or other potentially infectious material, are included in this exposure determination.

Department/Program	Position	Activity with Potential Exposure
Respiratory Care	Faculty, Staff, Student Employees	Instruction and supervision of students involved in simulated patient care and cleaning of contaminated instruments and equipment or handling biohazardous waste
Clinical Laboratory	Faculty, Staff, Student Employees	Cleaning of contaminated instruments and equipment or handling biohazardous waste
Clinical Laboratory	Faculty, Staff, Student Employees	Instruction and supervision of students involved in handling human blood, blood draws, tissue samples, processing and analyzing human blood or OPIM, and handling biohazardous waste

The following body fluids are not expected to be infectious sources of bloodborne pathogens unless they are visibly contaminated with blood:

- Urine
- Feces
- Vomit
- Tears
- Sweat
- Sputum
- Nasal Secretions

Faculty, Staff and Student Employees who do not perform the activities listed above where there is potential exposure are classified as Category B.
