

## Appendix B

### Exposure Determination by Job Classification

All of the following job classifications require Staff and Student Employees to perform procedures or occupation-related tasks that involve exposure, or the potential for exposure, to blood or other potentially infectious material, or that involve a potential for spills or splashes of blood or other potentially infectious material, are included in this exposure determination.

Department/Program	Position	Activity with Potential Exposure
College of Pharmacy	Professors, Instructors, Faculty, Staff, Student Employees	Needle administration of drug, direct patient care involving blood and/or OPIM
College of Pharmacy - Research	Professors, Instructors, Faculty, Staff, Student Employees	Administration of drugs or research involving human blood or OPIM

The following body fluids are not expected to be infectious sources of bloodborne pathogens unless they are visibly contaminated with blood:

- Urine
- Feces
- Vomit
- Tears
- Sweat
- Sputum
- Nasal Secretions

Faculty, Staff and Student Employees who do not perform the activities listed above where there is potential exposure are classified as Category B.
