Part Two: Locate the video on your computer

The videos can be hard to find on your computer. You could go to your finder window and search do a search on .MP4 and the files will show up with the same filename. You can find the location of the file when you click once on a file to select it. The file location is different on a PC and a MAC.

PC:

In your Documents folder there will be a new folder called "My Tegrity Recordings" and a subfolder called "Sessions."

C:\Users\petera12.FERRIS_AD\Documents\My Tegrity Recordings\Sessions\ COMM-105-MBA-Spring2_Chapter3-Part1/Commu_9232e356af414c3fa0d51893d1f1cab2\Recording\Class\Projector

Once in the "Sessions" folder, you will click on the folder with the class name and the title of the recording followed by a bunch of jiberish. Note: You might want to copy the name of the recording because you will want to use this later to rename the recording.

C:\Users\petera12.FERRIS_AD\Documents\My Tegrity Recordings\Sessions\ COMM-105-MBA-Spring2_Chapter3-Part1/Commu_9232e356af414c3fa0d51893d1f1cab2 \Recording\Class\Projector

As you can see, each recording has its own folder. To get to the MP4 video, click on "Recording." Click on "Class." Click on "Projector."

C:\Users\petera12.FERRIS_AD\Documents\My Tegrity Recordings\Sessions\ COMM-105-MBA-Spring2_Chapter3-Part1/Commu_9232e356af414c3fa0d51893d1f1cab2 \Recording\Class\Projector

In the projector folder there is a Videopodcast.mp4 file that contains both the audio and slide track. **NOTE:** You may want to rename the files to something more meaningful, such as COMM-105-MBA-Spring2_Chapter3-Part1, which is the name I copied from the folder.

MAC:

On the Mac, it might be easiest to go to the finder and search on MP4. Otherwise, you can click on your home directory => My Tegrity Recordings => Sessions => CourseName => Recording => Class => Projector. In the projector folder there is a Videopodcast.mp4 file that contains both the audio and slide track. You will want to rename the file (see **NOTE**).

The reason it is smart to rename the files is because that will become the title of the video.

Once the videos have loaded, they will say "Complete."
