

2017-2018 Faculty Research Committee Final Report

Chairperson: Jerome Trouba

One faculty was granted an extension though he asked too late in the cycle. The committee felt that though he asked after the deadline for an extension, the alternative would have been to not ask at all. We appreciated being kept in the loop and granted approval for continuation of the research. This academic year the committee consisted of ten faculty members from throughout the university. A total of five meetings were held and attendance was good throughout. We collected applications both in the fall and in the spring.

In Fall, two proposals were submitted and reviewed and were fully funded. \$13,300 total funded.

In Spring, four proposals were submitted and reviewed. **Three** were approved. One was not approved due to lack of innovation. \$22,766 total funded.

In all, the FRC approved funding of \$36,066 for research.
