

FSU Climate Survey

Step 1 of analyses: Demographic frequencies

- a) Data screening: The demographic section of the data has been inspected for missing values. Two subjects did not answer any question; therefore, their data were deleted from further analyses. Of the total 3156 respondents, we now have 3154 respondents.
- b) Our next set of analyses will be to screen the data for missing values in the scaled questions. Of the 3154 subjects that completed the survey, 350 subjects did not answer all the scaled questions. We will inspect these 350 subjects' answers carefully and decide if their data will be retained or be deleted from further analyses. Frequency distributions of the scaled data will also be examined.

Table 1: Number of subjects responded to demographic variables.

A total of 3,154 students completed the demographic section of the climate survey. The demographic section of the climate survey provided us with a general description of the students that completed the survey. Table 1 lists the number of subjects that provided answers to each demographic variable. A detailed frequency description of each variable is presented below.
