

## Sanitize Your Keyboard

### Supplies Needed to Clean and Sanitize your Keyboard

- Compressed Air
- Isopropyl Alcohol, 70%
- Q-Tips
- Microfiber lint free cloth

1. Shut down the computer and detach all connecting cables
2. Turn the keyboard upside down to shake out loose debris. Use compressed air to blow dust and debris out from the keys (keep nozzle  $\frac{1}{2}$  inch above keyboard at all times).

3. Clean around the keys with a cotton swab dipped in isopropyl alcohol.

4. Clean the keyboard with a cloth dampened in isopropyl alcohol.

5. Polish the keyboard with a microfiber lint-free cloth.
