

Eye Clinic of Wisconsin  
Average Rating for 2021 – 2022 5.00

Response Scale: 1 = Poor; 2 = Marginal; 3 = Adequate; 4 = Good; 5 = Excellent; N = NA

---

Student Comments:

- This was an excellent site! The wide variety of cases I was exposed to was only enhanced by a great team of doctors always willing to answer my questions. Great patient load and opportunity to manage cases long term.
- Could not have asked for a better place as my second rotation. Wish I could have stayed longer. All ODs/MDs cared about my learning and were happy to help and answer questions whenever necessary.

Eye Clinic of Wisconsin  
Average Rating for 2020 – 2021 4.56

Student Comments:

- Good autonomy and expectations of the extern, good variety of clinical experiences. Because of COVID, was limited and not able to view surgery or other specialties that would have been very helpful and a great learning experience. Overall, a great rotation site
- This rotation site was a great rotation and has been my favorite to this date. The patient load is larger than most, which means the student has a large selection of patients to see. The staff are friendly for the most part, and the equipment is great. I was able to run OCT's/topography/photos/B-scan/etc. whenever I had wanted. The long wait time for OCT's/fundus photos are the only concern I had while I was here. The rotation was very well-rounded, and I had the opportunity to manage primary care cases, fit specialty contact lenses, do pediatric/binocular vision exams, see post-ops, work in the retina department, and make many internal and a few external referrals. This rotation felt like a true, real-life optometric experience because the student has much more autonomy than other clinical sites. Because this is a large ophthalmology practice, there were opportunities to talk with MD's and shadow them as well. Normally, students would be able to sit in on surgeries to observe, but I was not able to this year due to COVID-19 restrictions. Overall, this rotation exceeded my expectations and was a great rotation with a variety of different patient encounters.
