
Wyoming Health Care Center
Average Rating for 2021 – 2022 4.52

Response Scale: 1 = Poor; 2 = Marginal; 3 = Adequate; 4 = Good; 5 = Excellent; N = NA

- This site was great. We saw a lot of interesting disease and got a good exposure to clinical pragmatism. I learned a lot and enjoyed my time here.
- This was a challenging rotation but good overall! This rotation helped me improve my skills and manage time better. I was happy with this rotation overall.
- The Wyoming VA has been my favorite clinic that I have been able to see patients in. The great team of Doctors makes this place a great learning environment. I would highly recommend this location to any of my colleagues!!
- The patients were the best part of this site! Overall, I felt the orientation I received was rushed, and then I was expected to jump in and stay right on schedule. It also would be nice to know what dates we have off in advance, instead of guessing or finding out the week of. I feel they assume we heard from past interns, rather than taking time to explain or educate us. I feel like this site was more about quantity rather than quality for the first month. While I saw a lot of interesting disease, many times I would be running behind and then be told that the doctor would finish up with the patient and I should move on to the next. While I understand the need to stay on schedule, this is a missed learning opportunity in my book, since I don't get to see how to correct my mistake. On a more positive note, grand rounds were a great learning opportunity! I got exposure to cases/conditions that I likely wouldn't have seen in a more routine PC setting. I was disappointed that they scheduled our second grand round session over academy weekend. They would not reschedule, so I was unable to attend academy, considering I didn't want to do the makeup for missing. I think these could have easily been done over zoom to accommodate everyone's schedule. Overall, Dr. Kerns, Dr. Coon, and Dr. Kuipers were great at educating us, if we sought it out.
- Fast paced schedule, but do-able. I loved working with everyone at the VA. I also really appreciate the opticians for their diligent work and I wish I could have had a list of what the optical is able to offer patients based on their visual and ocular needs as I would often talk to patients about things I couldn't give them and the opticians would have to straighten things out. It would be helpful to know the guidelines at the beginning of the semester in order to stay consistent in offerings to patients as a suggestion for future interns. Thanks for everything!

Average Rating for 2020 – 2021 4.92

Response Scale: 1 = Poor; 2 = Marginal; 3 = Adequate; 4 = Good; 5 = Excellent; N = NA

- I learned so much at this site! I feel much more comfortable with interpreting OCTs and managing ocular disease. All of the doctors were great to work with.
- Overall this rotation was fantastic. Although it was only my first rotation I won't be surprised if it ends up being my favorite. All of the doctors do a fantastic job working with students. I feel confident I'll be a better Dr. as a direct result of my time at this rotation.
- This has honestly been my favorite clinic I have had. After this semester, I am actually beginning to feel like a doctor and I am sad that I have to leave. Thank you
- I got to see a variety of diseases and patient complexity at this site. It is a good site for working on time management, efficiency, and patients with multiple conditions. The doctors are nice and very knowledgeable.
- Overall a great rotation!
- I really enjoyed this rotation site! I gained so much experience with ocular disease, and all the clinical instructors were great to work with.
- Excellent rotation site! State of the art equipment, EMR was a pain but unavoidable due to its use in every VA.
