COLLEGE OF HEALTH PROFESSIONS

PREVIEW

FALL 2018

CHP 50TH ANNIVERSARY

The College celebrates 50 years of health professions education.

BULLDOGS GIVE BUTTS THE BOOT

FSU students collected discarded cigarettes across campus.

GOLDEN EAGLE

Honoring Linda Meeuwenberg with the Distinguished Alumni Award.

DENTAL THERAPISTS

Gov. Rick Snyder signs legendary Dental Therapy Bill.

IN FOCUS:

IMAGINING MORE

Nuclear Medicine Technology alumnus, Dr. Alton Smith, discusses his pathway to success in the health professions.

MISSION STATEMENT

The mission of the College of Health Professions is to train and educate future healthcare professional leaders through inter-professional collaboration, practice and academic excellence.

CORE VALUES

We believe in/that:

- High quality in education and learning for our students
- Leader-centered approach in all we do
- Our faculty members are active in both teaching and learning
- Developing our faculty and students into leaders (Opportunity)
- Healthcare professionals play a vital role in affecting healthcare outcomes, quality of care and costs (Collaboration, Diversity, Opportunity)
- Anticipating and responding to changes and opportunities in society and the healthcare environment
- Supporting collaborative, integrative, and inter-professional initiatives

VISION STATEMENT

The College of Health Professions will be a recognized leader in the preparation of healthcare professionals.

- Supporting partnerships for academic/professional excellence in Health (Collaboration, Diversity, Learning, and Excellence)
- Supporting creativity, innovation and professional ethics
- Open and diverse learning environments
- Programs should drive supportive resources
- Any learning process should involve practical applications
- Setting high professional performance standards for our students and ourselves (Professional Ethics)
- The importance of scholarly activities and professional service in terms of developing an active intellectual environment (Collaboration, Diversity, Professional Ethics, Excellence, Learning and Opportunity)

20 CHP HIGHLIGHTS

26 DEANS LIST

MESSAGE FROM THE EDITOR-IN-CHIEF

Welcome to the fifth edition of the new CHP Preview eNewsletter. Thanks to our readers for the supportive and valuable feedback on our previous publications. We have completed another productive academic semester and we are excited to share just a "preview" of the many great happenings and achievements throughout the College.

If you find any of the stories or spotlights inspiring, please share it with your friends and family. Also, we would love to hear from you. If you have a story or feedback to share with us, please contact us at CHP@ferris.edu

-LINCOLN A. GIBBS, ED.D, MPH, CHES

GRAPHIC DESIGNER

Our CHP Graphic Designer, Kayla Sheffield, worked hard to design this years newsletter. Please enjoy reading through the activities of the semester!

CHP Preview is a publication of Ferris' College of Health Professions. Its purpose is to connect the CHP with its many stakeholders and to disseminate both CHP news and pertinent issues in healthcare. Ferris State University 2016. Special Acknowledgment: Bill Bitzinger, Manager of Photographic Services, University Advancement and Marketing

DEAN'S WELCOME

Dear Alumni, Students, Colleagues and Friends,

I am pleased to welcome you to the Ferris State University College of Health Professions (CHP). As the newly appointed Interim Dean, I am excited by the opportunity to usher in new vision and shared goals for the college that will further our overarching mission and expand our community reach. I am privileged to have inherited a talented community of faculty, staff and students that are committed to excellence in teaching, scholarship, academics and service. A unique strength of our community is that it brings together people of different abilities, lived experiences, ambitions and perspectives that serve to enrich our culture. Our variances makes CHP an exciting and productive community in which to teach, study and pursue relevant education in the health professions.

It is an exciting time to be a higher education provider for the health professions. Advancements in medical technology, improvements in standards of practice and expanding health care roles continue to create new opportunities for graduates of the health professions. We

pride ourselves on the ability to produce highly qualified candidates to compete for opportunities in health care. Through our 24 clinical and non-clinical certificates, associates, bachelors, masters, and doctorate degree programs, we intentionally cultivate our students by exposing them to unique experiences, such as; interprofessional education, interdisciplinary simulation experiences, academic service learning, student research projects, volunteerism, innovative speaker series, study abroad education, student organization advocacy, clinical rotations, and internships. We are not only preparing our students to make significant contributions to the delivery of health care, but to the development of every community.

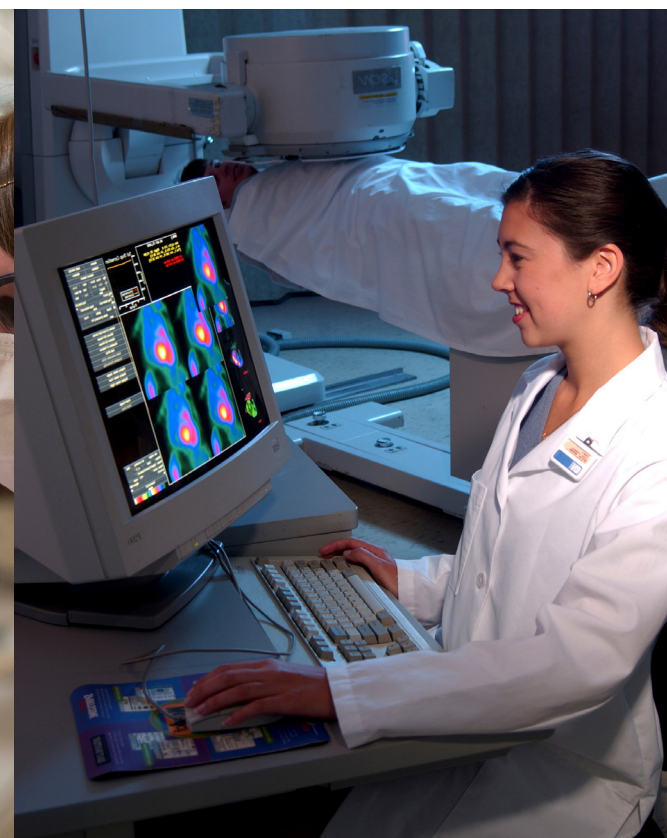

This year, CHP celebrates half a century of programming at Ferris State University. We will commemorate the prominent footprints this College has made since its inception in 1968 as the School of

Health Sciences and Arts. It will be a fun and exciting academic year! I would like to take this opportunity to thank every single person who has helped shape who we are as a college community. We are grateful for our many partners, alumni, friends and donors that have given their time, talents and gifts to the college to keep our legacy alive.

Our future is bright! I believe no other college of health professions better prepares clinical laboratory scientists, dental hygienists, diagnostic medical sonographers, health care systems administrators, health information managers and technologists, diagnostic molecular scientists, nuclear medicine technologists, nurses, radiographers, respiratory therapists, public health specialists, and leaders for a changing world than the College of Health Professions at Ferris State University. I encourage you to get to know our community and all that we can offer you.

Go Bulldogs!

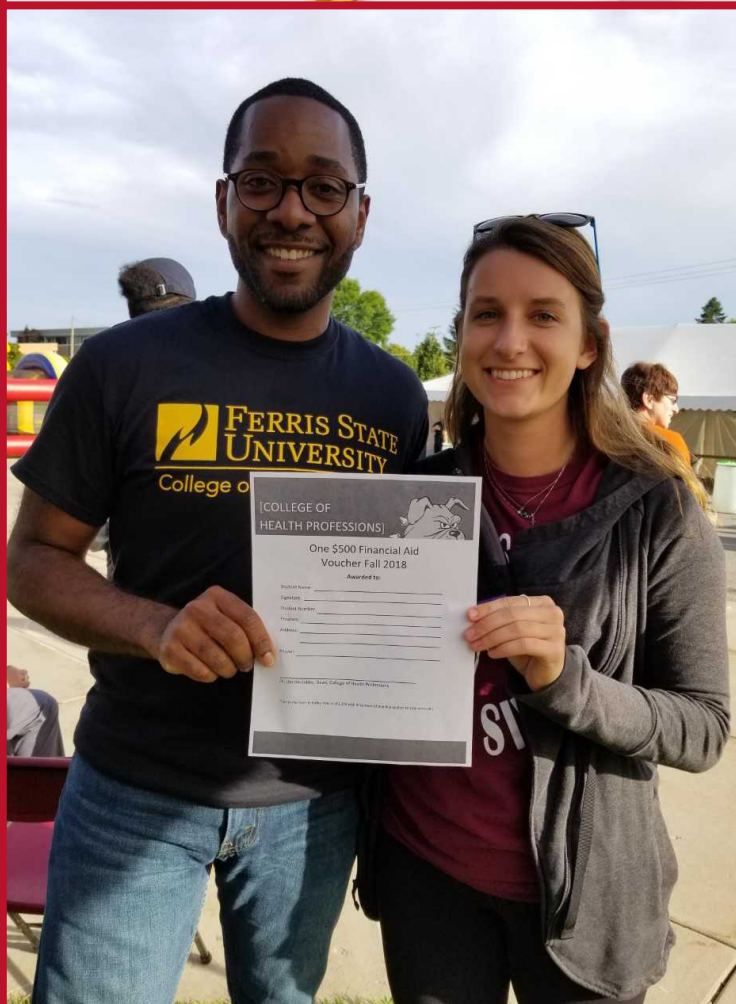

Lincoln A. Gibbs, EdD, MPH, CHES
Interim Dean, College of Health Professions
Associate Professor, Public Health

ROCK THE BLOCK!

CHP WELCOME BACK PICNIC

50TH ANNIVERSARY GALA

CELEBRATING 50 YEARS OF HEALTH PROFESSIONS EDUCATION

SCHOLARLY ENDEAVORS

NEW PUBLICATION

Assistant professors in Ferris State University's Public Health program have collaborated on an article that was published July 11 in the online issue of the journal, *Pedagogy in Health Promotion*.

Anuli Njoku said the work, "Infusing Health Disparities Awareness into Public Health Curricula at a Rural Midwestern University," is an outgrowth of her participation in the Health Equity Leadership Institute (HELL) at the University of Wisconsin in Madison. She participated in the intensive summer workshop, in 2016; her co-author, Fathima Wakeel attended HELL, in 2015.

"We learned in HELL, that as researchers, the process calls for us to come forward with a product," Njoku said. "Generally, those who attend the institute work on acquiring grant funds or writing manuscripts. Our 'deliverable' is this paper, as Fathima and I discovered that we were each placing elements of health disparity consideration in our coursework which is offered across the Public Health curriculum."

Njoku said they began the documentation and content review process in Fall 2017.

"As we live and teach, in an area of the rural Midwest, we are able to observe and detail incidence of health disparities, as they relate to such factors as a recipient's gender, race or socio-economic status," Njoku said. "Fathima and I feel that we were able to make the issues regarding these disparities clearly understood while emphasizing the importance of finding remedies to the shortcomings that were discovered."

Njoku said that Ferris' College of Health Professions' faculty and staff are committed to incorporate content to detail health disparities in the Public Health curriculum, in both the Bachelor of Science and Master of Science degrees.

"This is a step in an ongoing process," Njoku said. "The Faculty Center for Teaching and Learning, or FCTL was a key collaborator. It can be a complex process for professors to meet the demands of instruction and find time to invest in research

and writing. We acknowledged the FCTL in our article, giving them due credit for the support that the center has provided to new faculty."

Wakeel and Njoku were part of FCTL's Junior Faculty Fellows program.

"The key considerations in this program are teaching, scholarship and service," Njoku said. "Our project calls on us to teach awareness of health disparities and to assess the impact that this instruction has on our students. We have presented our research at a professional conference and shared this with our peers on campus. I also made a presentation on this subject last December, in Thailand, which was supported by an FCTL grant."

Njoku said she and Wakeel would be continuing their work on health disparities, through research and offer presentations on their findings.

GRANT

Congratulations to the Clinical Laboratory Sciences for being awarded an ASPCA Foundation Laboratory Science Program Director Educational Grant for \$2,500.

Grant

Congratulations to Anuli Njoku for receiving a Timme Travel Grant of \$1,200 to travel to Greece in May, 2019.

Anuli has also published "Teaching Health Disparities Awareness in Undergraduate Public Health Course" in an issue of the *International Journal for the Scholarship of Teaching and Learning*. To read, [click here](#).

APPROVED PROJECT

Congratulations to Sandra Burns and Catherine Archer for being approved for the Academic Service Learning project.

DOCTORATE

Congratulations to Mary Beaudry for receiving her doctorate degree!

GRANT

Congratulations to Michael Reger for receiving a faculty research grant of \$6,200 for the student research fellowship.

SPEAKER

Congratulations to Dr. Gail Bullard for having the opportunity to speak at the inaugural AUPHA/MGMA Academic forum the MGMA national conference in Boston, MA.

Dr. Bullard spoke at the inaugural AUPHA/MGMA Academic forum at the MGMA national conference in Boston, MA, Oct 1, 2018. Addressing the forum focus 'The Consumerism of Health Care – Through the Lens of Medical Group Practice and Ambulatory Care', Dr. Bullard presented 'There is No 'I' in Change – Or is There?', a discussion of the impact patient expectations have on change in healthcare delivery models and the need for improved health literacy, starting within the medical practice, as a key element in patient understanding regarding the impact of one's personal behaviors on personal health.

NEW MEMBER

Congratulations to Dr. Lincoln Gibbs for getting the opportunity to join as Board Member of the American Red Cross of West Michigan.

Every day, the Red Cross assists people who face emergencies across the U.S. and internationally. Dr. Gibbs is excited to support the needs of the people of Mecosta and Osceola County in this new role.

PRESENTATION

Dr. Mary Beaudry presented her research through the Faculty Center for Teaching and Learning's Junior Faculty fellows Program. The Junior Faculty Fellows Program (JFFP) has several goals, including helping Fellows identify and develop a project relevant to their teaching, scholarship, or service; supporting Fellows in their project work; facilitating the establishment and growth of relationships and rapport among fellows; and providing Fellows with a venue for sharing their work with the University community.

GREGORY ZIMMERMAN

Gov. Rick Snyder recently appointed Gregory Zimmerman, academic department head of Clinical Laboratory, Respiratory Care, and Health Administration in the College of Health Professions, to the Michigan Board of Occupational Therapists. He will serve on a nine-member board that assists the Michigan Department of Licensing and Regulatory Affairs in overseeing the licensure and practice of Michigan's occupational therapists and occupational therapy assistants.

Zimmerman has been with Ferris since 2009, and is committed to helping students succeed. This spring, he spearheaded the inaugural (1st annual) golf scramble to support the College of Health Professions' Endowed Student Economic Assistance Scholarship Fund which raised in excess of \$16,000. He is also active in the Global

Healthcare Conference (GHC), an interdisciplinary Academic Research Organization that addresses global health challenges. He serves as a GHC peer reviewer on the program committee, acts as a regular conference speaker, and in 2015, gave the keynote address in Singapore.

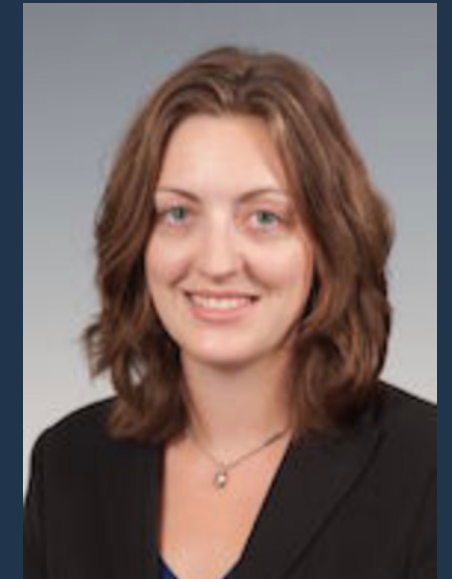

Zimmerman earned a doctoral degree in higher education leadership from Nova Southeastern University. He also earned a master's degree in health services administration and a bachelor's degree in sports medicine and public health education, both from Central Michigan University.

Zimmerman will serve a four-year term through December 31, 2021. His appointment is subject to the advice and consent of the Michigan State Senate.

ELECTED

Congratulations to David Petillo for being elected as Chair of the Senate Faculty Research Committee.

NEW PUBLICATION

Congratulations to Jacqueline Peacock for her publication "Genomic Status of MET Potentiates Sensitivity to MET and MEK Inhibition in NF1-Related Malignant Peripheral Nerve Sheath Tumors".
To read, [click here](#).

ACCREDITATION

Congratulations to the Bachelor of Science Respiratory Therapy Program for earning accreditation from the Commission on Accreditation for Respiratory Care.

STUDENT RESEARCH FELLOWSHIP

Campus laboratories are active places during the Summer 2018 semester, as 12 Student Research Fellowship projects are being investigated by undergraduate and graduate-level students.

Grants administrator Wendy Stapp, with the Office of Research and Sponsored Programs, said the Office of the Provost and Vice President of Academic Affairs provided funding for 10 of these projects, with additional support received from the College of Arts and Sciences to finance two SRF proposals.

"We had 18 project applications, a variety of proposals offered by a number of university colleges," Stapp said. "All of the projects that were given support are underway, with students being paid over a three-month period for their work as principal investigators. Their faculty mentors receive stipends to cover supplies and other costs that result from these activities."

Michael Reger, an assistant professor of Public Health in the College of Health Professions, is

supporting Breanna Frasher, a third-year student in the program, as she researches Phytoestrogen Release and the Risk of Total and Advanced Colorectal Cancer.

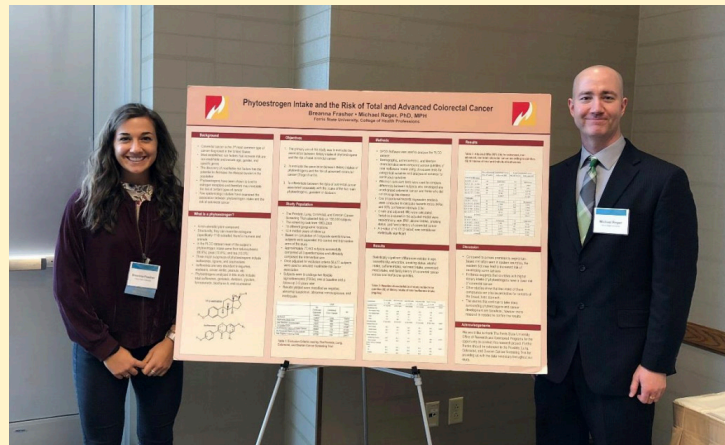

"I think this is a great project, particularly if Breanna were considering a Master of Science degree," Reger said. "The research work allows her to determine if this type of work is something she wants to keep doing, while gaining the advantage of having her name included in a published study."

Reger said Frasher is immersed in background work, including the interpretation of various pieces of literature, and as a student research fellow will help to develop the manuscript of their publication.

"Learning how to analyze data is a valuable asset for any student considering going on to a graduate-level program, and is a skill set prospective employers are looking for," Reger said. "This kind of research will set Breanna apart as it is of great assistance in pursuit of a leadership position."

Breanna Frasher is studying Phytoestrogen Release and the Risk of Total and Advanced Colorectal Cancer with the support of assistant professor of Public Health Michael Reger.

GOLDEN EAGLE LINDA MEEUWENBERG

Congratulations to Linda Meeuwenberg for receiving the Distinguished Alumni Award! The Ferris State University Distinguished Alumni Award is bestowed on individuals who demonstrate leadership and service to their profession, community, service organizations and alma mater. These award recipients help guide our multicultural society toward the celebration of our own diversity through their accomplishments within their vocations and avocations.

Since 1956, Commencement week activities have included the presentation by the Ferris State University Alumni Association of Distinguished

Alumni Awards recognizing exceptional career success and noteworthy fidelity and devotion to the University.

Linda Meeuwenberg is a 1968 and 1978 graduate of the College of Health Professions, earning her associate degree in Dental Hygiene and bachelor's degree in Allied Health Education respectively. After leading a distinguished career as a dental hygienist and Ferris faculty member, she now owns the consulting firm Professional Development Association, Inc.

Passion Led Us Here

BULLDOGS GIVE BUTTS THE BOOT

To show some of the effects of smoking on campus, students spent Halloween day collecting as many discarded cigarettes as they could on FSU grounds and were able to fill three garbage bags full. Students then placed the cigarettes in clear plastic jars and bags to display on Nov. 16, in the University Center.

Alyson Hill, Anthony Picard and John Quilitzsch spent Halloween day picking up as many discarded cigarettes they could find on the grounds of Ferris State University. The cigarettes were on display during the Great American Smokeout event on campus to encourage students, staff and faculty to quit smoking for environmental reasons.

GOV. RICK SNYDER SIGNS BILL AUTHORIZING DENTAL THERAPISTS

SB 541 allows dentists to voluntarily expand practices, and expands access to dental care

LANSING, Mich. — Gov. Rick Snyder has signed into law bipartisan legislation that aims to expand access to dental care for Michigan residents. SB 541, championed by Sen. Mike Shirkey (R-Clarklake), authorizes a mid-level dental provider called a “dental therapist” to perform a variety of routine procedures that previously were only performed by dentists.

Dental therapists will be a unique tool to target the currently underserved populations in our state. Language in the new law will limit their practice to safety net settings such as federally qualified health centers, rural health centers, school-based clinics or they could work in other offices in shortage areas or where they are willing to see a majority of publicly-insured patients.

“This bill will ensure an improvement in overall access to oral health care for underserved patients, while allowing dentists the chance to expand their

practices,” said Sen. Shirkey. “Too often, those with limited access to dental care resort to emergency rooms for relief and Michigan taxpayers have to foot the bill. Creating dental therapists is a solution from both a public health and fiscal perspective.”

Dental therapists will work as part of the dental team to provide preventive and routine restorative care, similar to a physician assistant on a doctor’s team. Supervised by a dentist, dental therapists can help dentists treat more patients.

Seventy-eight of Michigan’s 83 counties have at least one dental shortage area, leaving millions of Michigan residents without access to basic and routine oral care. Limited access to oral health care impacts some of Michigan’s most vulnerable residents, including seniors, pregnant women, children in low-income homes and those living in rural areas.

“Oral health is a window to overall health and well-being,” said Amy Zaagman, executive director of the Michigan Council for Maternal and Child Health. “Limited access to adequate dental health care comes with a hefty price tag—often in the form of missed days at school or work and larger dental problems that could have been avoided with routine care. We look forward to seeing dental therapists help our safety net settings and forward-thinking dentists provide access to care for many populations in Michigan currently underserved because of where they live or the type of insurance card they carry.”

“Dental therapists will be a unique tool to target the currently underserved populations in our state.”

IMAGINING MORE IN FOCUS: DR. ALTON SMITH

Dr. Alton Smith is a Board Certified Diagnostic Radiologist in Grosse Pointe, Michigan and is affiliated with Beaumont Hospital. He came to Ferris State University (FSU) from his hometown in the greater Detroit area in the late 80s. His family originated from a small place in the beautiful Caribbean island of Jamaica. *"My mother and father immigrated here back in the late 60s, early 70s. We wanted better opportunities when coming to America. Ferris was a big part of that. It allowed us to thrive in the US."* His parents valued education and encouraged him to go to college. *"We chose Ferris because it was kind of like a family tradition. My uncles went here and my sisters, so it was almost an automatic decision that I would be coming to Ferris."*

Ferris was a world of discovery for Alton. He developed many life-long friendships and found a sense of purpose in his life. *"Ferris was probably the best time of my life. It was a time of discovery of who I was as a person. The people that I met here helped me figure out who I was. I had a lot of fun times but also many serious times. I always knew I had to take care of business and do the work if I wanted to be successful."*

Alton naturally gravitated to the sciences. He always had an interest in medicine. He started his academic studies at Ferris in the College of Pharmacy, but it would take some curricular challenges and life journeys before he fully actualized his true calling. *"I was activated to go to a war in my second year of college. I went to Saudi Arabia and spent a year overseas to fight for the war. I went back to Ferris and decided to switch from Pharmacy to the Nuclear Medicine Technology program. I chose nuclear medicine because it paralleled the pre-medicine curriculum."* Alton completed his Bachelors of Science in Nuclear Medicine Technology and Associates in Pre-Medicine degrees prior to moving on to his next course of studies.

Prior to medical school, Alton worked at various hospitals and health centers with his newly conferred degrees. *"I worked for two years at Henry Ford Hospital with Ferris' program and from there I was employed by the Detroit Medical Center at Harper Hospital while I applied for medical school. My Nuclear Medicine Technology degree helped pay for my financial needs while going through medical school."*

During medical school, Alton began to carve a pathway to his career choice in Urology. He studied the basics of medical science and in his last two years, he learned more clinical medicine and rotated through different aspects of medicine. However, not everything went as planned. *"Once you complete your rotation, you have a choice to make; you choose which career path you want to do. Mine was not to be nuclear medicine; it was to be a Urologist. I wanted to be a surgeon. You go through a match program where you interview at different residencies programs and meet with them but they are interviewing*

you at the same time and if there is a match then you can go into that program. Unfortunately, I did not match in Urology, so I had to find what I wanted to do...fortunately, Radiology was meant to be."

Dr. Smith is confident about his unexpected journey into Radiology. His patient interactions reminds him constantly that he has made the right choice. *"...this past week, I'm standing in line for coffee and a lady comes up to me and says 'you did my procedure. I got pregnant after the procedure!' The procedure was opening up her fallopian tubes to assist with her getting pregnant... she got pregnant and that was probably the best experience. That made my day! It was great to know that I helped her and changed her life for the better."*

Many advancements have been made since Dr. Smith began his studies and practice in Nuclear Medicine Technology. *"Imaging is not the way it used to be. When I started here, images were analog. The equipment we use had a specific crystal that when a radioactive wave strikes the crystal, it illuminates light. Analog means putting the film in the machine and any light that strikes the camera is duplicated. Therefore, nuclear medicine images are just a collection of many radioactive events that are happening, and when you collect so many of those events, you turn the machine off, develop the film, and you get a picture. Now you can manipulate the intensity of the images that you can get."*

Further, the field of Radiology is now combining imaging with patient procedures. Dr. Smith is excited by this advancement because not only does he get to use imaging to treat and diagnose patients, the advancements are improving the cost of medicine and patient outcomes. *"For example, I help people with varicose veins. In the past, I used to strip it, but now I guide a laser to the vessel itself and when I turn the laser on, it shuts the vessel down. This is a 40 min procedure compared to a full day procedure in the past...when there is an advancement in imaging technology there is an advancement in the field of Radiology and medicine as a whole."*

Dr. Smith is optimistic about the future of Radiology and encourages students with an interest in science to consider a career in the field. His advice is simple and concise. *"Radiology is a pretty competitive field, so I would say the more experience you have with the field of Radiology the better off you are. Consider an undergraduate degree that has some related substance to it. If you get a degree in Nuclear Medicine Technology, it will help you tremendously! You cannot skate your way into Radiology. Hard work and determination is key... also know that the pathway is not all academic. You will be required to interview for placements and be able to express your passion and commitment to the field. Beyond everything else, get to know who you are and never give up when your plan unexpectedly changes."*

CHP HIGHLIGHTS

CHP Students Coach Second-Graders In Hand Washing

BIG RAPIDS — The season of stuffed or sniffing noses and continuous coughs will soon begin in schools around the area.

One way youths can help cut down on the spread of germs is thoroughly washing their hands, a lesson Brookside Elementary School second-graders brushed up on during class as students from Ferris State University's nuclear medicine technology program presented the hand washing project on Monday.

After receiving glow germs, Blake Shibley checks how dirty his hands are under a black light before putting Monday's hand washing-lessons to the test.

"This was an academic service learning project to provide a service to the community," said Tracy Glentz, FSU nuclear medical instructor. "With this, the nuclear medicine technology students

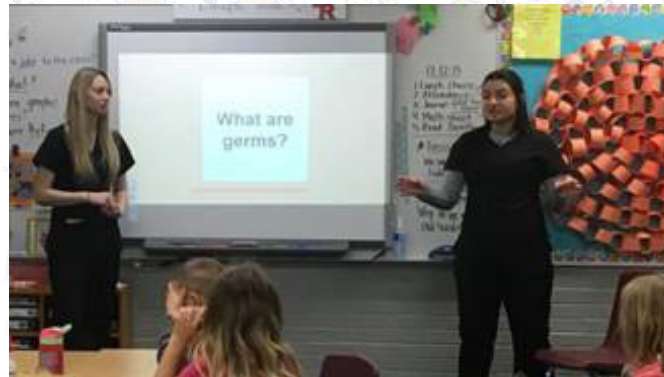

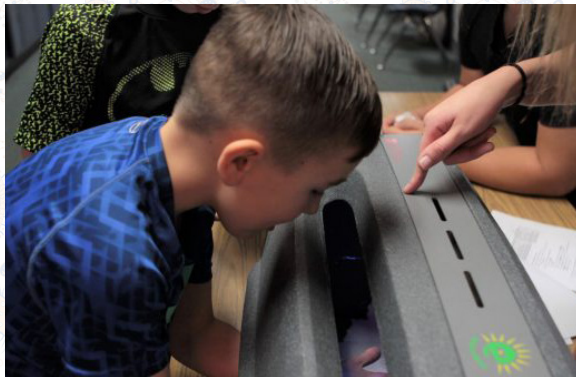

are able to promote healthy environments and get the benefit of interacting with potential pediatric patient populations."

FSU students spent the morning pulling their younger peers from the classrooms of second-grade teachers, Karen King, Justine Upham and Christina Jacobs, and placing "glow germs," glow-in-the-dark powder, on Brookside students' hands, which they then held under a black light. To get rid of the germs, second-graders were coached in basic hand-washing skills by their FSU visitors, and could double-check if all of the germs had been properly washed away by looking under the black light a second or third time.

"This lesson is important every year but right now, the second-graders' personal goal is to be proactive and take care of themselves," King said.

FSU student, Mitchell Xiong (right), put "glow germs" on second-graders' hands, like those of Madie Chapman (left). (Pioneer photos/Meghan Gunther-Haas)

FSU Public Health Students – Serving the Community

Students from the Public Health Student Association gained valuable networking and learning opportunities when they assisted with the Second Annual Chronic Disease Prevention Summit held on Friday, September 21, 2018 in Ferris' University Center. The Summit's theme was "The Power of Collaboration" and was attended by more than sixty healthcare leaders from across the state including Spectrum Health Big Rapids and Reed City, as well as the District Health Department #10 Mecosta office.

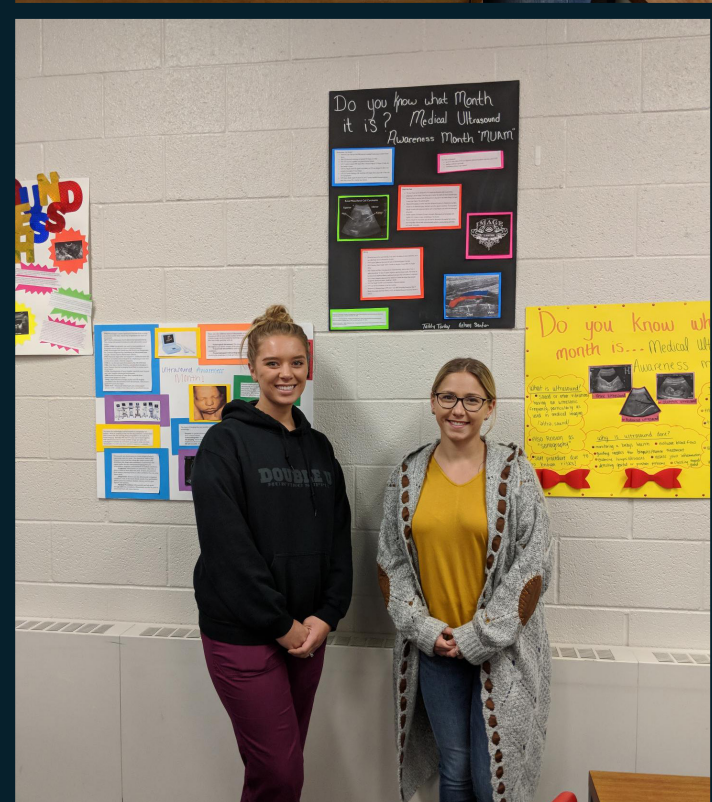

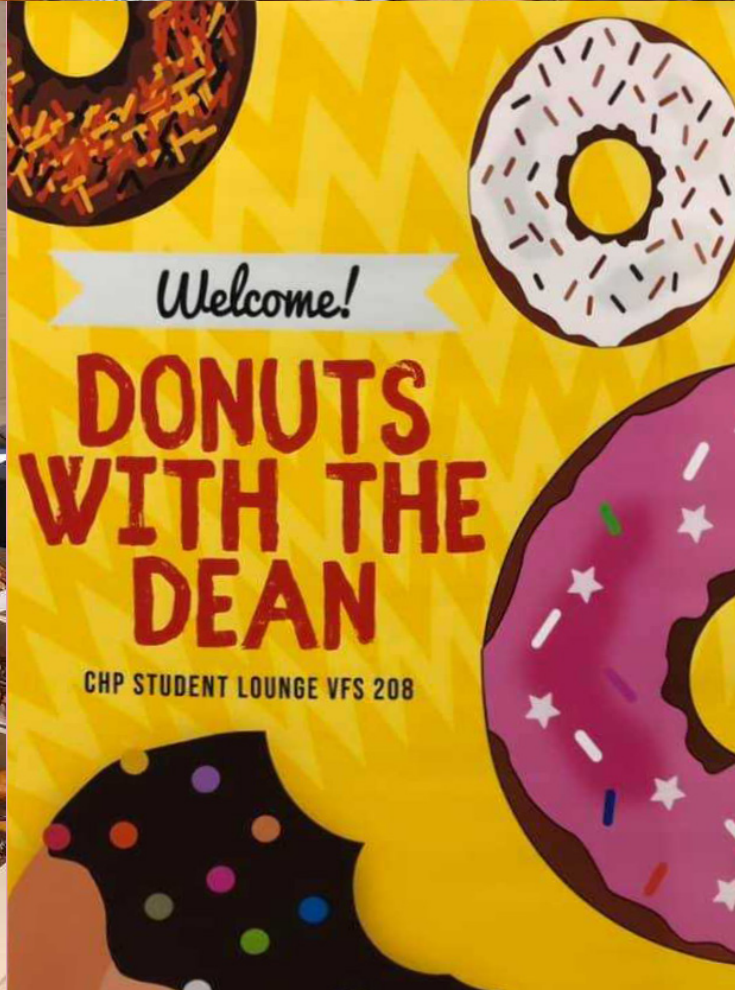

The Summit, sponsored by the Northwest Michigan Chronic Disease Council (NMCCDC) District #10 Health Department, provided sharing of best

practices from each of the ten counties represented in District #10. Faculty involved included Dr. Gail Bullard, Chair of the NMCCDC and Program Coordinator of the Master of Health Administration (MHA) program, and Dr. Fathima Wakeel, Program Coordinator of the Bachelor of Science in Public Health (BSPH) program. An interdisciplinary experience, the event offered opportunity for individuals from all areas of healthcare to share and learn from one another, as well as gain exposure to the Ferris campus community.

Public Health students (from left to right) Tricia Smith, from Grand Rapids, and Breanna Frasher, of Beaverton, pose in front of their informational stand

MUAM

The first year Diagnostic Medical Sonography students created posters for Medical Ultrasound Awareness Month (MUAM) to engage and educate the community about diagnostic medical sonography.

MUAM is held annually in October to create awareness of the role diagnostic medical sonographers play in the medical community and to educate the public about medical ultrasound and its many uses in healthcare. MUAM is a joint effort of the American Institute of Ultrasound in Medicine (AIUM), American Registry for Diagnostic Medical Sonography (ARDMS), American Society of Echocardiography (ASE), Cardiovascular Credentialing International (CCI), Society of Diagnostic Medical Sonography (SDMS), and Society for Vascular Ultrasound (SVU).

2ND ANNUAL GOLF SCRAMBLE

JUNE 7, 2019

FALCON HEAD GOLF CLUB

SPONSORED BY
COLLEGE OF HEALTH PROFESSIONS

\$75 PER PLAYER

18-holes of golf, Cart, Breakfast,
and Lunch Package

Scholarship Benefit

All money generated will be applied toward Ferris State University's College of Health Professions Endowed Scholarship Fund in support of student economic assistance

Register Online:
